about me

Namaste! I'm [Ananda K. Maharjan](#), Nepal based Graphic Designer. I'm passionate about graphic and web design. I have extensive knowledge in print production and Pre-press. I always aim to create **creative** and **unique** layouts.

I have **six years** experience in Graphic Design and Print production. I started my career as a Graphic Designer in 2002. I have worked as a Senior Graphic Designer for FORMAT Graphic Studio and DIGISCAN Pre-Press. While working with FORMAT and DIGISCAN, I have acquired extensive knowledge on the layout designs and print process. I have good experience in designing brochures, flyers, newsletters, magazines, posters, books, reports, annual reports,

corporate identity and other publications layouts. After acquiring knowledge in Graphic Designing I was interested in web-designing and started designing websites from 2005. I have acquired competitive skills in various modern graphic/web design technologies such as Adobe InDesign, Photoshop, PageMaker, FreeHand, Illustrator, Acrobat, XHTML, CSS, Dreamweaver etc. My interests include photography, typography, blogging and travel.

Creative design requires continuous learning and exposure to divergent ideas. I am currently mastering my skills in PHP, MySQL, CMS, Flash, Javascript and Ajax. If you are interested in contacting me please e-mail me at: anandako@gmail.com
